Professional Summary

B.Tech Computer Science graduate currently working as an AI Engineer / AI Support Engineer with practical exposure to AI voice agents, chatbots, prompt engineering and technical support. Experienced with PBX and VoIP environments including FreePBX, Asterisk, SIP, IVR, extensions, trunks and call routing. Familiar with JavaScript, React, Node.js, Java and Python. Interested in building a long-term career in AI Engineering, AI integration and full-stack development.

Professional Experience

AI Engineer / AI Support Engineer **Virtuo.in, Gurugram**
2026 – Present

- Provide technical support for AI-powered voice and chatbot solutions and assist with testing, configuration and issue resolution.
- Create and improve prompts for AI voice agents and chatbot workflows according to business and customer requirements.
- Work with FreePBX and Asterisk-based PBX environments including SIP extensions, trunks, IVR, inbound/outbound routes and call flows.
- Troubleshoot SIP registration, call connectivity, routing, extension and audio-quality related issues.
- Perform server monitoring, disk-space checks, script monitoring and basic troubleshooting of call-centre infrastructure.
- Work with communication platforms such as Plivo and assist in testing IVR and call-related configurations.

Education

Bachelor of Technology (B.Tech) – Computer Science and Engineering **2022 – 2026**

Technical Skills

Programming	Java, Python, JavaScript, HTML, CSS
Frontend	React.js, HTML5, CSS3, JavaScript
Backend	Node.js, REST APIs
AI / LLM	Prompt Engineering, AI Chatbots, AI Voice Agents, AI Integration
Telephony	FreePBX, Asterisk, SIP, IVR, Extensions, Trunks, Call Routing
Tools	Git, GitHub, VS Code, PuTTY, MicroSIP, Zoiper, Plivo
Other	Technical Troubleshooting, Server Monitoring, Customer Support

Projects

AI Resume Analyzer

- Designed an AI-based web application concept that analyzes resume content and provides suggestions to improve skills, structure and overall presentation.

PBX / VoIP Testing Lab

- Practiced configuring SIP extensions, trunks, IVR and inbound/outbound call routes using FreePBX and Asterisk, along with troubleshooting common call connectivity issues.

Core Strengths

Technical Troubleshooting — Problem Solving — Quick Learning — Communication — Team Collaboration
